ITRC 2022 Annual Meeting

March 28 – 31, 2022 – Salt Lake City, UT

Dear Potential Supporter

The goal of the ITRC Annual Meeting is to provide a networking and learning environment for ITRC members and experts. The Annual Meeting is one of the limited opportunities for the technical teams to work in person on solutions to some of the top environmental and health challenges nationwide. It's hard to believe our last in person Annual Meeting was in Boston, MA in March 2019! We've come a long way virtually since then but can't wait to be in person and to celebrate the 2020 and 2021 accomplishments, changes, and the road ahead for 2022.

Who will be there in March 2022? It's exciting to announce we will feature team meetings for ten Technical Teams:

- PFAS
- Environmental Data Management Best Practices
- Microplastics
- Application of Guidance Documents to Hydrocarbon Sites
- Pump & Treat Optimization
- Chemicals of Emerging Concern
- Quickening Environmental Solutions and Training
- Ethylene Oxide Emissions
- Sediment Cap Technology Update
- Enhanced Aquifer

We value the support of our Meeting Sponsors and are excited to offer three categories for sponsorship levels for 2022:

- ❖ **Meeting Sponsor (\$2,500):** Logo included on the event webpage and agenda; company highlight in two ITRC email communications.
- ❖ **Break Sponsor (\$5,000):** All the Meeting Sponsor benefits plus logo displayed during the Plenary presentation and a company logo poster at all breaks.
- ❖ **Platinum Sponsor (\$10,000):** All the Break Sponsor benefits plus the opportunity to show a corporate video (no more than 3 minutes) during a main function (based on scheduling for the actual meeting), and the opportunity to display limited material at the registration area.

We hope to see you in Salt Lake City in March 2022! If you would like to discuss any other sponsorship opportunities, please contact me at preyes@ecos.org. All sponsor funds will need to be received by February 1, 2022. We are excited to collaborate with you as we continue to move ahead in environmental innovation!

Sincerely,
Patty Reyes, ITRC Director
